## Council Still Getting Offers For Property

Some Property Disposed of and Some Referred to Committee.

At the council meeting last Monday evening more applications for the purchase of town property were received. Some offers were accepted and others were referred to the Building committee for investigation.

Mr. Allison, representing the local Legion, waited on council and asked permission to use the Reid Hall for holding the carnival on Oct. 23rd and 24th. Permission was granted and the Legion insured the building while it was in use.

The offer of Miss Deane for house in Lockwood was accepted. Mr. McEachern's offer for house on First St. was accepted. The offer of Mr. Mathewson for house on Main St. was rejected and the price on same was set at \$225. The offer of S. Bailey for house on First St. was referred to the committee and the offer of Mr. Brooks for the Riley house on the same street was accepted.

A letter was read from the Minister of Municipalities authorizing council to proceed with the tax sale. On motion of councillors Champ and Campeau the Secretary was instructed to proceed with necessary arrangements for holding the sale.

The request from the School Board for the necessary funds for salaries was granted.

Instructions were given to collect all arrears of rentals from tenants in town property.

The action of the Mayor and councillor Brydie in selling pulleys from the ornamental ark was endorsed.

## Russia Apopts A New Calendar

Will Have 73 Weeks of 5 Days To Each Week

The Soviet government at Russia has published a decree revolutionizing the calendar. Under the decree, which is effective next Sunday, a number of days will be added to the year.

The universal day of rest will therefore be abolished. Work days will be half an hour longer to make up for the increase in rest days from 52 to 73 yearly. All religious holidays will be stopped.

Another practice fire is reported near Pinivie last week. About six miles of pasture were burned over.

## Save Trips to Town

You may safely send your deposits to this bank by mail. Every deposit by mail will be given careful and immediate attention, and you will receive an acknowledgment by return post.

## Statesman Relaxes

Rt. Hon. Winston Churchill, Chancellor of the Exchequer in the Baldwin administration, caught by the photographer in a moment of relaxation at the Banff Springs Hotel in the Canadian Rockies during his recent tour of the Dominion.

Ing his recent tour of the Dominion, he was accompanied on his tour by his son, Randolph, his nephew, John, and his brother, Major Churchill.

## Here and There

(234)

In commemoration of the ill-fated Arctic expedition which culminated in the deaths of Edward Heath in 1746 and in which Danville and many of his men died of illness, His Honor Lieutenant-Governor Tait of Nova Scotia unveiled a monument erected by the Historic Sites and Monuments Board of Canada at Redcliff, N.S., recently. Many distinguished guests attended the ceremony.

Total quantity of strawberries exported from Nova Scotia to the United States during the present season was 2,000 crates with 22 boxes to the crate. The bluest berry record proportion, 20,714 crates having been shipped in August for this year, with another month to go as compared with 11,412 crates for the whole season of 1928.

Major prize winners at the Atlantic Gathering and Scottish Festival recently held at Banff are announced as follows:— Pipe-band, Donald McDonald, Highlanders of Winnipeg, is the winner of the special trophy presented to the pipe band officially connected with any treatment of the Canadian and Piping Society, Montreal, took the highest number of points over all in the open piping events.

According to figures obtained by the Canadian Pacific Steamships Limited, the port of Vancouver now ranks first of Pacific coast ports, displacing San Francisco and Los Angeles in volume of outward and inward shipping traffic and tonnage of exports and imports.

It is, paying me first attention to Canada as Chief of the Salvation Army and while I hope to meet at the annual gathering to be held in the Dominion early in the month of November in Canada and Newfoundland.

General E. J. Higgins, elected head of the Salvation Army, who spent his summer in the Dominion, is expected to arrive in the Dominion in the month of November.

More than 25,000 of new fall hats have been made in the Dominion during the period between June 1st and September 1st of this year, is the statement made recently by D. H. Brown, vice-president of western lines.

The Dominion of Australia, it is estimated, has made a further 25,000 hats since under consideration as at September 1st.

Insurrection of 1,200 shells of air mail envelopes on the Pacific is reported about October 1st, 1929, when the Pacific Mail Company, which has been in the business of shipping mail for many years, has been forced to stop the service to the Pacific coast of America.

## The Woman in White Coming to Cameo

"Tide of Empire," a vivid drama of the California gold rush, will be shown at the Cameo on Monday next, with a huge cast in the dramatic story of the "Days of '49." The picture is an historical romance of the discovery of gold in California and the gold rush that overthrew Spanish rule and started the modern era of progress in the west.

"The Woman in White," will be shown next Thursday. When William Collins wrote this book he kept two continents awake with the greatest novel he ever penned. Now this celebrated mystery story with its delightful love romance has been brought to the screen with Blanch Sweet as the star. Miss Sweet went to England to make this picture. On the moors of Scotland and in a highland castle, the story was filmed on the very spots where Collins wrote his novels.

Rev. W. B. Smith goes to Brooks Thursday evening to take part in the induction of Rev. Turner, the new minister of the United Church in that town.

In a railroad accident in Calgary last week one car of freight was completely burned. In the contents of the car were all the wedding presents of Mrs. M. Millard (nee Miss Hicks) which were totally destroyed.

The loss will be very great. The young bride received many valuable presents.

The Indian grave, discovered by the Canadian Pacific employees at work near Pinivie, last May, is considered by experts to be between 100 and 400 years old. It is thought the grave was originally above ground but because of erosion has been buried in the earth.

Tri-motored airplanes are being launched in one of the most spectacular in the history of aviation. War has been declared by the Canadian Government and the airplane is to be the principal arm of the service. Flies each carry 2,000 pounds of powder, and will cut a mile-firing line, over the tree tops.

The bluest berry industry is showing much improvement in Vancouver and Eschmone counties, Nova Scotia. Last year there were only 4,000 crates of berries, but this year the harvest was 20,000 crates. The value of crop last year was \$50,000 and it is estimated that the crop this year could be increased to \$100,000.

## George Thomson Died In Edmonton Saturday

Was a Resident of Redcliff For The Past 18 Years

Although it was known last week end that George Thomson of this town, was passing through the valley of the shadow, at the home of his sister in Edmonton, the news of his death, came last Saturday afternoon, came as a severe shock to his many friends here. Mr. Thomson had been here for some time. He underwent an operation a few years ago and never, since had he regained his previous robust health. A short time ago he went to Edmonton to consult specialists but from the start he got very little encouragement for his ultimate recovery. He gradually grew weaker until the end came. Mrs. Thomson went with her husband to Edmonton and was with him when he passed away. His two sons here left for Edmonton Saturday but did not arrive in time to see him alive.

Deceased came to Redcliff with his wife and family in the fall of 1911 and has resided here ever since. Although of a quiet unpretentious disposition, he was for his thoughtfulness, for others, kindness and fairness in decision, made a host of staunch friends, all of whom most sincerely regret his passing and extend to his widow and family genuine sympathy.

The late Mr. Thomson was born in Portobello, Scotland, 47 years ago. He came to Canada when a young man and after working in several parts of the west, settled in Redcliff. Besides his widow deceased leaves two sons, George and Wilfrid at home a sister and a brother in Edmonton and a sister in Winnipeg.

The funeral took place in Edmonton and was conducted by the Masonic fraternity.

This week Mr. and Mrs. R. S. Fothering of Harvest Vale, are moving to town for the winter.

Mrs. Kerr and daughter Anna, who have been visiting friends in B. C. for the past few months returned home last week end.

The Girls' Athletic club will hold a meeting in their club rooms on Tuesday, let. let for the purpose of re-organizing for the winter months. Girls 16 and over who contemplate joining should attend this meeting.

Mr. and Mrs. Geo. McKay and family returned home Monday from a visit to Mr. and Mrs. McKelvie of the Brooks district. They report that Mr. McKelvie has just finished harvesting a very successful crop.

Keep in mind the Legion Carnival which will be held in Reid Hall on Wednesday and Thursday Oct. 23rd and 24th. Big preparations are being made for the event. Be sure to get a ticket for the Radio which is to be given away the last night of the carnival.

Jack, Hope and Bill Evans played a game of horseshoes for the championship of the town. Hope won out by a narrow margin and now he issues a challenge to any one in Medicine Hat or Redcliff for a double or single game of either horseshoes or quoits. Bring a your next best.

## Passenger Trains Change Time Sunday

Big Difference in Arrival of Westbound Trains Here

Commencing next Sunday there will be a change in the timetable for passenger trains on the C.P.R. For trains going west the time is very different from what it has been for some time. No. 1, which now leaves here at 10:25 a. m. will, after Sunday, leave at 2:30 p. m. No. 3 westbound which now leaves here at 10:20 p. m. will in future go through at 2:45 a. m.

Time for eastbound trains has not changed very much. No. 4 will go through at 7 a. m. and No. 4 at 8 p. m.

By this change the C. P. R. will reduce its travelling time from coast to coast, several hours.

## Redcliff Doctor Weds at Edmonton

WARD—BULYEA

At the family residence in Garneau, Edmonton, at 10:30 o'clock last Saturday morning the marriage took place of Josephine Hendry, daughter of Dr. and Mrs. H. Ernest Bulyea, to Dr. Alfred Edward Ward of Redcliff, son of Mr. and Mrs. M. Ward, of Sedgewick, the Rev. I. J. Stord officiating. Miss Jean Bulyea, sister of the bride, was accompanied and La. E. Hollies of Wainwright, was best man.

Following the ceremony a reception was held to more than 30 guests. Dr. and Mrs. Ward are spending their honeymoon at the coast and will later be at home at their home here.

Since the above was set up we learned that only one of the westbound trains is scheduled to stop here. That is the one that goes through at 2:08 p. m.

## Churches

ST. AMBROSE CHURCH

Rev. J. L. Cooper

Sunday School at 10

Matins and Sermon 11

## Preserving One's Health

Periodic Medical Examinations Only Safe Measure To Take To Guard Against Disease

(By Dr. Gordon Bates, General Secretary, Canadian Social Hygiene Council.)

I had a very good friend—a leading professional man, in middle life. "I feel"—what a tragedy those two words can suggest, as they do in the present instance. My hard work my friend had earned a position of the highest standing. He was a leading citizen, a gentleman. He was at the top of his profession. In terms of life generally, he had reached that broad, calm plateau which some fortunate men attain after the climb and the storms of youth are over. It seemed to be in the best of health; Canada had reason to expect of him long years of most useful work, thought and guidance.

And then one evening he dropped dead.

What a shock to his family and friends. What a loss to the community in which he lived—that this individual of ripest years, matured mind, of great force of character and personality, this leader, should have been stricken down just when the peak of his destiny seemed to be shining brightly.

And the greater tragedy was this: that his death was preventable. There was no need for him to have died for another twenty or thirty years.

There are thousands of deaths like that, every year.

For scores of years, people have been saying: "an ounce of prevention is worth a pound of cure." If only those who say that so glibly could appreciate its profound truth, if only they would take the trouble to apply it to their own health and well-being.

My friend disdained of a heart condition that was entirely unsuspected. He had never experienced any symptoms, he had never believed that anything was the matter with him. To most people, that is sufficient to induce them to let the death be absolutely unpreventable, but that is not so.

Medical science has progressed far beyond the knowledge of the layman. The X-ray sees things that are hidden to the naked eye. And if he had known the kind of heart trouble he was running, he would have been warned by his doctor, could have dealt with conditions which registered yearly in heart disease, or were the heart disease already in existence could have regulated his life as to intake of food, rest, and exercise, and could have taken up to a point, that organ would have overcome its disability, and often better instead of dying.

There is no possibility of error here; it is recognized by leading doctors of the world over, by the man who has his system examined and "overhauled" regularly just as a sensible motorist has a car overhauled regularly, has a far better chance of longer life than one who does not.

No one doubts such a reasonable claim. It isn't public skepticism that is to be overcome; it is public indifference. The average man is too busy trying to add a thousand dollars to his income to bother about adding ten years to his life.

A very large proportion of illnesses die with their incipient stages, will not become serious. During these incipient stages, the symptoms are slight, and are scarcely noticed by a layman. In fact, no early symptoms may be present whatever. Furthermore, there are many physical conditions that are forerunners of illness conditions which may lead up to illness if not checked. It is the little things that have to be watched—the inconsiderable signs that grow into great diseases. Here the importance of regular physical examination looms large.

Large, blood pressure, overweight, are examples. Or a man's habits may need to be corrected. Cancer, syphilis, tuberculosis are all diseases that it is supremely important to combat early, and whose earliest symptoms are not always manifest to the patient.

In a pamphlet issued to physicians by the Dominion Department of Health, and compiled by the Canadian Medical Association, the following appears: "The average man habitually accepts his variations from the normal as something to which he should be resigned. The Army experience demonstrates clearly that a very high percentage of supposedly fit and active men coming rich and poor alike, have some physical impairment which in many cases, is due to preventable causes. It has been shown further that improvements may result upon the correction of such defects and by the establishment of proper hygiene and dietetic habits.

Periodic health examinations afford the best systematic opportunity.

(a) To observe the development of the individual.

(b) To detect the earliest signs of change from the normal and of impending disease.

(c) To observe the effects of a hygienic daily regime.

(d) To note abnormal conditions arising from neglect of the laws of health.

(e) To recognize the benefit of following advice given to correct these conditions.

(f) To detect the early signs of local infections and the results of their treatment.

(g) To accumulate facts regarding early symptoms of disease and treatment.

(h) To investigate the possibilities of cure in cancer, tuberculosis, venereal diseases, etc.

(i) To observe the importance of hygienic and dietetic treatment in general.

(j) To recognize the benefit of following advice given to correct these conditions.

(k) To detect the early signs of local infections and the results of their treatment.

(l) To accumulate facts regarding early symptoms of disease and treatment.

(m) To investigate the possibilities of cure in cancer, tuberculosis, venereal diseases, etc.

(n) To observe the importance of hygienic and dietetic treatment in general.

(o) To recognize the benefit of following advice given to correct these conditions.

(p) To detect the early signs of local infections and the results of their treatment.

(q) To accumulate facts regarding early symptoms of disease and treatment.

(r) To investigate the possibilities of cure in cancer, tuberculosis, venereal diseases, etc.

(s) To observe the importance of hygienic and dietetic treatment in general.

(t) To recognize the benefit of following advice given to correct these conditions.

(u) To detect the early signs of local infections and the results of their treatment.

(v) To accumulate facts regarding early symptoms of disease and treatment.

(w) To investigate the possibilities of cure in cancer, tuberculosis, venereal diseases, etc.

(x) To observe the importance of hygienic and dietetic treatment in general.

(y) To recognize the benefit of following advice given to correct these conditions.

(z) To detect the early signs of local infections and the results of their treatment.

(aa) To accumulate facts regarding early symptoms of disease and treatment.

(ab) To investigate the possibilities of cure in cancer, tuberculosis, venereal diseases, etc.

(ac) To observe the importance of hygienic and dietetic treatment in general.

(ad) To recognize the benefit of following advice given to correct these conditions.

(ae) To detect the early signs of local infections and the results of their treatment.

(af) To accumulate facts regarding early symptoms of disease and treatment.

(ag) To investigate the possibilities of cure in cancer, tuberculosis, venereal diseases, etc.

(ah) To observe the importance of hygienic and dietetic treatment in general.

(ai) To recognize the benefit of following advice given to correct these conditions.

(aj) To detect the early signs of local infections and the results of their treatment.

(ak) To accumulate facts regarding early symptoms of disease and treatment.

(al) To investigate the possibilities of cure in cancer, tuberculosis, venereal diseases, etc.

(am) To observe the importance of hygienic and dietetic treatment in general.

(an) To recognize the benefit of following advice given to correct these conditions.

(ao) To detect the early signs of local infections and the results of their treatment.

(ap) To accumulate facts regarding early symptoms of disease and treatment.

(aq) To investigate the possibilities of cure in cancer, tuberculosis, venereal diseases, etc.

(ar) To observe the importance of hygienic and dietetic treatment in general.

(as) To recognize the benefit of following advice given to correct these conditions.

(at) To detect the early signs of local infections and the results of their treatment.

(au) To accumulate facts regarding early symptoms of disease and treatment.

(av) To investigate the possibilities of cure in cancer, tuberculosis, venereal diseases, etc.

(aw) To observe the importance of hygienic and dietetic treatment in general.

(ax) To recognize the benefit of following advice given to correct these conditions.

(ay) To detect the early signs of local infections and the results of their treatment.

(az) To accumulate facts regarding early symptoms of disease and treatment.

(ba) To investigate the possibilities of cure in cancer, tuberculosis, venereal diseases, etc.

(bb) To observe the importance of hygienic and dietetic treatment in general.

(bc) To recognize the benefit of following advice given to correct these conditions.

(bd) To detect the early signs of local infections and the results of their treatment.

(be) To accumulate facts regarding early symptoms of disease and treatment.

(bf) To investigate the possibilities of cure in cancer, tuberculosis, venereal diseases, etc.

(bg) To observe the importance of hygienic and dietetic treatment in general.

(bh) To recognize the benefit of following advice given to correct these conditions.

(bi) To detect the early signs of local infections and the results of their treatment.

(bj) To accumulate facts regarding early symptoms of disease and treatment.

(bk) To investigate the possibilities of cure in cancer, tuberculosis, venereal diseases, etc.

(bl) To observe the importance of hygienic and dietetic treatment in general.

(bm) To recognize the benefit of following advice given to correct these conditions.

(bn) To detect the early signs of local infections and the results of their treatment.

(bo) To accumulate facts regarding early symptoms of disease and treatment.

(bp) To investigate the possibilities of cure in cancer, tuberculosis, venereal diseases, etc.

(bq) To observe the importance of hygienic and dietetic treatment in general.

(br) To recognize the benefit of following advice given to correct these conditions.

(bs) To detect the early signs of local infections and the results of their treatment.

(bt) To accumulate facts regarding early symptoms of disease and treatment.

(bu) To investigate the possibilities of cure in cancer, tuberculosis, venereal diseases, etc.

(bv) To observe the importance of hygienic and dietetic treatment in general.

(bw) To recognize the benefit of following advice given to correct these conditions.

(bx) To detect the early signs of local infections and the results of their treatment.

(by) To accumulate facts regarding early symptoms of disease and treatment.

(bz) To investigate the possibilities of cure in cancer, tuberculosis, venereal diseases, etc.

(ca) To observe the importance of hygienic and dietetic treatment in general.

(cb) To recognize the benefit of following advice given to correct these conditions.

(cc) To detect the early signs of local infections and the results of their treatment.

## WORLD HAPPENINGS BRIEFLY TOLD

"Lord Baden-Powell of Gilewell and Rover" is the title (tab) by Robert Baden-Powell, founder and chief of the Boy Scout movement.

Control of food prices in Britain is likely to become a matter for legislation when parliament re-assembles.

A recent report issued by the Immigration office at Seattle, Sta. Marie, shows that 12,190 people entered Canada from the United States at this port during the year.

Peri has ended his long absence from participation in the affairs of the League of Nations. Decision has been made to resume full co-operation in all activities.

Sir Horace Plunkett, veteran Irish statesman, and bachelor, is learning to fly at the age of 73 years. He is taking lessons at the Brooklands air-drome in Surrey, England, and is keen as a boy.

Two Western Canada candidates were successful in the primary examinations for the fellowship of the Royal College of Surgeons in England. Tests were held in Toronto for the first time in Canada.

Setting a record for all time 121 deaths required a coroner's investigation in Toronto during July. Of these, 30 met violent deaths through industrial mishaps, motor mishaps, and other accidents. Sudden and sudden seizures took large tolls.

You can rent an aeroplane at Kansas City, Missouri, and fly it yourself if you have a pilot's licence. Saunders' Fly-it-yourself Company, has been formed with 200 stock places. The rental charge is \$15 and \$30 an hour.

Dr. Hartley Smith, former president of the Toronto Academy of Medicine, and one of the leading physicians in Canada, died at the Toronto General Hospital recently. Dr. Smith was a native of Italy and had been in Canada since 1911. He was well known in military circles.

## Exports Of Pulp and Paper

## Considerable Increase Shown In First Half Of Current Year

For the first half of the current year exports of pulp and paper were valued at \$91,198,000, compared with \$94,104,081 in the corresponding six months of 1928, according to the monthly report of the Canadian Pulp and Paper Association. Wood-pulp exports for the period amounted to \$21,470,000, and exports of paper to \$70,728,075, as compared with \$22,339,880, and \$71,764,201 respectively for the first half of 1928. Pulpwood exports have been smaller this year, the six month shipments being valued at \$5,942,625, as compared with \$6,929,000.

## Canada's Forests

The total forest area of Canada is estimated to be 1,151,454 square miles. Of this area, 865,880 square miles are productive and accessible; a little over one-third of this area bears timber of merchantable size. The remainder carries young growth not yet fit for use.

Any first-class watchmaker can deliver selections from his own works.

A bad imitation of watchfulness is better than the real thing.

## The Campers' First Aid

Minnard's is good for burns, bruises, sprains, wounds, and insect bites.

W. N. U. 1739

## Too Much Low Flying

## Habit Is Menace To Public and Should Be Forbidden

Aeroplane pilots crashing as a result of collisions with telephone or telegraph wires or falling on account of losing their flying speed, a few hundred feet above the earth brings up the danger of persons on the ground when accidents of this kind occur. The newspapers recently carried a despatch from Kentucky about a student pilot crashing in the centre of the business district of a Kentucky town, killing the aviator and two business men. Those who are interested in flying and genuinely anxious to promote the development of aviation have been doing everything in their power to bring into effect regulations that will make for the safety of those who fly and those on the ground. Despite their efforts it is possible that too much flying at a low altitude is being done over Western Canadian cities and towns. An aeroplane a few hundred feet above a city street is a menace to aviation. The accident that killed three lives in the Kentucky town might be repeated here.

The authorities, no doubt, would have the hearty co-operation of aviation officials in training regulations that would prevent flying over cities and towns. Furthermore, no pilot should be allowed to fly above or around a city or town who is not familiar with the location of all towers, telephone, and telegraph wires.

Aviation is so important that everything possible must be done to reduce risk of every kind—Regina Daily Post.

## Winnipeg Newspaper Union

## PARIS COTTON PROCK

It is quite possible to appear smart, dandy and comfortable this season, because Paris decrees the latest printed cottons are the newest choice for summer wear. Style No. 562 is strikingly effective in printed cotton voile. It is in flattering capricious tones which enhances the charm of the sun-kissed complexion. The piled yoke of bodice which boasts of modern-line dress, is in plain dress in blending tone which appears again in circular inset of skirt. The blouse is given a swished effect through drapes of skirt. It is a dress that is dress for town or resort. It comes in sizes 15, 18, 20 years, 36, 40, 42, 44 and 46 inches bust. Printed, wash, sheer linen in pastel or print, flowered cloth, shantung, printed silk, crepe, de chine, and georgette crepe appropriate. Patterns price 25 cents in damask or coin (coin preferred). Wrap coils carefully.

## How To Order Patterns

Hairst and planes cause a lot of trouble because people refuse to let them alone.

## A WESTERN INSIDE

Mr. and Mrs. John Frederick Sanderson, mapped as they were leaving Knox College Chapel, Toronto, following their marriage. The bride was formerly Miss Beryl Hodgins, younger daughter of Mr. and Mrs. H. G. Hodgins, of Mooseman, Sask. The groom, who is the son of Mr. F. G. Sanderson, Liberal whip for the Dominion, is a member of the staff of the London Advertiser, London, Ontario.

## Start Out Of World

Three Young Women Plan Trip To Remote Places

Arrayed in trim khaki colored breeches and shirts, leather puttees and caps with badges on them, but also wearing lip rouge so they won't be mistaken for motor cycle cops, three young women have set out from New York in a light motor truck to "go places and see things" in remote corners of the earth.

They are heading for Alaska; the party consists of Baroness Chiriac Von Brandenstein; a movie actress, Miss Nada De Namur, and a girl reporter, Miss Margaret D'Angelo, Ottawa, Ont.

They're going to all the remote places they can find—party, Miss De Namur confessed, in answer to a masculine challenge that women can't do that sort of thing—and partly on the theory that, being more patient and painstaking than men, they'll find out a lot of "dope" that the male explorers passed up.

"We're going as far north in Alaska as we can in the car. Then we hope to get an aeroplane ride and after that dog teams until we get away where no white women have been before."

"And after that we're going to the Gobi desert, the wilds of Australia, Iceland and, oh, lots of places. We expect to circle the globe and get back in about three years."

## No Butter Shortage

Production In Prairie Provinces Greater Than Last Year  
There is evidently not going to be any scarcity of butter in Western Canada this year. Production of creamery butter in the prairie provinces in 1929 is considerably greater than last year.

For the first five months of this year receipts of creamery butter at output in Alberta showed an increase of 15 per cent. compared with the corresponding five months of 1928. The quantity of creamery butter produced in Saskatchewan during the five months under review was 3,831,236 pounds, compared with 3,305,820 pounds during a similar period last year, an increase of 1,748,610 pounds, or 84 per cent. Manitoba creamery butter production was 2,807,840 pounds, compared with 2,608,828 pounds, an increase of 899,012 pounds or 34.5 per cent.

## More Than Obsolete

"It is no obsolete," said his wife, "he will never do anything he's asked."

"He was always like that," said his wife. "As boys we were out in a boat once when a dispute arose, and he was thrown overboard, with the injunction 'Sink or swim!'"

"Which did he do?"

"Neither, he lay on his back and floated."

The Cross Of Snow  
The famous cross of snow in the Holy Cross National Forest of Colorado is formed by two snow filled crevices on the side of the mountain. The cross is visible for miles.

The United States Imports 2,000,000 pounds of bananas a year.

## Proved His Heroism

## George Horne, Toronto Hockey Player, Gave Life For Companions

The other day three Canadian young men found themselves in dire peril when the canoe in which they were travelling of a prospecting tour in Northern Ontario upset.

The men clung to the upturned canoe but when it was seen that the weight of the three of them was more than the boat would stand, one of them struck out to swim for the shore. He was George Alexander Horne, star forward of the Maple Leaf hockey team of Toronto, commonly known to hockey fans as "Shorty." The weather was bad, the lake was rough, and Horne went down before he could reach the land. His two companions state that Horne's action in taking a chance on reaching the shore by swimming undoubtedly saved their lives.

"Shorty" Horne, no doubt, was just an average young Canadian, claiming to be no better than the ordinary run of fellows with whom he associated. He did the things that the average young Canadian does; he played hockey, was active in sports, knew how to handle a canoe, liked the open-air life and the northern waters and hills. No one would pick him out as of heroic stuff, yet when deadly suddenly in the lashing waters of a Northern lake, threw a challenge in his face, he took up the gauntlet without hesitation that others might have his lives.

Sir Philip Sydney, English knight, gives us the cup of water God-given soldier; "Shorty" Horne, hockey player and prospector, lays down his life to save two friends.

The race retains its element of greatness—Regina Daily Post.

## Canada Developing Trade

Official Returns Show Big Increase In Export Business

How Canada is developing trade with other countries is indicated by official returns showing the trend of export business with countries with which the Dominion exchanges what is termed "most-favoured nation" treatment. Seven years ago Canada exported to thirteen foreign countries with which she had "most-favoured nation" arrangements, goods valued at \$73,000,000. In the fiscal year ended March 31, 1929, Canadian exports were valued at \$120,000,000, an increase in seven years of \$127,000,000. From these countries Canada imported \$45,194,000 in 1922, and \$90,000,000 in the fiscal year ended March, 1929. The countries include Argentina, 24-1/2, Chile, Colombia, Denmark, France, Italy, Japan, Netherlands, Norway, Spain, Sweden, Switzerland, Venezuela.

## Envoys From South Africa

Eric Louw, South African High Commissioner in London, has been appointed minister plenipotentiary and envoy extraordinary to Washington. The appointment was made in conformity with the new policy of Premier Hertzog's party, which desired separate diplomatic representation for the Union in certain capitals.

## Farm Families' Income

According to an estimate made by the Nor-West Farmer, the 248,162 farm families in the three prairie provinces received \$651,400,584 in their 1928 marketings. This makes a cash income of \$2,544 per home in excess of seed, feed, meat, vegetables and other commodities produced and retained by the farmer for his own requirements.

## Find Old Inscriptions

A fossil turtle, belonging to an unknown species, has been found by the Field Museum of Natural History. The shell of the turtle bears six Chinese inscriptions which are thought to be more than 4,000 years old. They are in the earliest of Chinese writing and correspond to the characters on the famous oracle bones of Hsiao.

Revenue from tourists visiting Canada will, it is expected, total nearly \$200,000,000 this year. Last year tourists spent over \$200,000,000 in the Dominion.

Tourists looking for Sunday parking places will be glad to learn that a few choice ones may still be found near church porches.

## Your food doesn't do you any good if you're tired

At the end of a day's work, relieve nervous tension before eating. Wrigley's will refresh and tone you up—so that you're ready to enjoy your food.

Then, after meals, Wrigley's helps digestion, cleanses the teeth, removes all traces of coffee and other sweets from the breath.

## Increasing Elevator Capacity

An Addition Of Over 25,000,000 Bushels To Be Provided This Year

An addition of over 25,000,000 bushels in the course of being provided to elevator, capacity in Canada this year, the additions being principally in Ontario and at Vancouver and Halifax. The projects are: Prescott, 5,000,000; Kingston, 5,000,000; Sarnia, 2,000,000; Muskoka, 2,000,000; Collingwood, 2,000,000; Port Colborne, 2,000,000; Goderich, 1,000,000; and 1,000,000; Owen Sound, 2,000,000; Vancouver, 3,000,000 and 1,000,000, and Halifax, 1,000,000.

## Gas From Cypress Hills

Plan To Supply Saskatchewan Points With Natural Gas

H. J. Cowham, representative of Messrs. Roth and Parout, oil gas producers, has been in Moose Jaw recently making arrangements for the development of gas and oil wells in the Cypress Hills to supply gas to the cities of Regina and Saskatoon. He expressed confidence that natural gas could be supplied Moose Jaw and Regina, and that the gas and oil from the Cypress Hills where, he states, gas and oil is located.

## Railway Exhibit At Brandon Fair

The machinery exhibit at the Brandon Fair this year is reported to have been the largest ever held in Canada, exceeding also that of any State fair held across the line. The number of machines, tractors, threshers, and so forth, the fair has 618 as compared with 490 last year, while the number of firms exhibiting rose from 57 to 74.

## New Industries For Winnipeg

Recent new industries established in Winnipeg, include manufacturers of furniture, metal products, packing-house products, electric fixtures, children's hats, and cash and doors.

## WINDOLITE

## The Improved Glass Substitute

MADE IN ENGLAND

COMES WITH A MESSAGE OF HEALTH

WINDOLITE stands for 100 per cent. sunlight. It makes light let strong windows for cattle sheds, dairy sheds, poultry houses, broilers and all out buildings. It is economical, unbreakable, flexible and is easy to cut and fit. It is now being successfully used in nurseries, verandas, schools, factories, hospitals, sanitariums, hot beds, plant coverings and greenhouses. It keeps out cold—will not crack or chip—cuts with an ordinary pair of scissors and is easy to fit. WINDOLITE is supplied in rolls any length but is one width of 36 inches only. A square yard of WINDOLITE weighs about 14 lbs., while a square yard of glass of ordinary thickness weighs about 135 to 140 lbs. The improved WINDOLITE requires no valuing. WINDOLITE is then in England.

Price \$1.50 Per Square Yard, F.o.b. Toronto.

Use WINDOLITE and let YOUR PLANTS YOUR CHICKENS YOUR CATTLE

Mask in 100 % Sunlight Send for booklet "WINDOLITE"

Distributors: JOHN A. CHANTLER & CO., LTD.

## Interesting Local Items

Mrs. McLaren of Calgary formerly of Redcliff, has returned to town and will make her home here in the future.

Jack Sharkey knocked out Tom Loughran in the third round in the heavyweight bout at New York.

Increased interest is being shown now in the O. C. football sweep. Mrs. Cathcart drew top winning team last Saturday.

Mel Cowie, of Calgary, formerly of Redcliff, retained his title as featherweight champion of western Canada, by defeating Vic Skeriton of Regina, at Rumbeller Wednesday night.

Mrs. McNeil, of Fort William, arrived in town this week to be with her sister, Mrs. Cathcart, during the latter's illness.

Mrs. R. Thomson and R. McCorty of Brooks paid a hurried visit to town last Sunday. They were returning from visiting a friend in the Hat Hospital.

Mrs. W. J. Fairbairn received word this week informing her that her brother, Robt. Ritchie, had been killed in an auto accident near Fergus, Ont., on Friday, Sep. 13th.

Mrs. Dumas celebrated her

86th birthday at the home of her granddaughter, Mrs. E. H. Waloff, last Saturday. Mrs. Dumas is still enjoying good health. She has a very retentive memory and as she has travelled extensively, she is a most interesting conversationalist. She had a number of callers for the day to wish her many happy returns.

## THE FRIEND OF LOVERS

Few people have heard of Mrs. E. M. Gilmer, but 30 millions daily read the advice of Dorothy Dix. Mrs. Gilmer's pen name, whose photograph, shown above, was taken recently during her stay at the Banff Springs Hotel. She was on her way from New Orleans, her home, to Vancouver whence she sailed for a trip to Alaska aboard the Canadian Pacific steamer Princess Charlotte.
